

Interactive Example Candidate Responses

Paper 3 (May / June 2016), Question 3

Cambridge IGCSE™
Physics 0625

In order to help us develop the highest quality resources, we are undertaking a continuous programme of review; not only to measure the success of our resources but also to highlight areas for improvement and to identify new development needs.

We invite you to complete our survey by visiting the website below. Your comments on the quality and relevance of our resources are very important to us.

3 Fig. 3.1 shows a metal plate-warmer.

Fig. 3.1

The plate-warmer contains two small candle heaters. Plates of food are placed on top of the warming-tray.

(a) (i) State the name of a process by which the thermal energy from the candles passes to the warming-tray.

radiation [1]

(ii) State the name of the process by which thermal energy moves through the warming-tray.

convection [1]

(b) The outside of the plate-warmer is shiny.

Suggest how this helps the plate-warmer to stay hot.

It conducts heat and prevents heat from being lost [1]

(c) The handles of the plate-warmer are made from metal.

Identify a problem with this, and suggest how the problem could be solved.

problem: metal conducts heat hence the handles will be too hot to touch.

action: make the handles out of something that does not conduct heat of heat, [2]

3(c)

Q3	Mark scheme
(a)(i)	convection OR radiation
(a)(ii)	conduction
(b)	poor emitter OR poor radiator (of thermal energy)
(c)	(handles) become hot use an insulator

3 Fig. 3.1 shows a metal plate-warmer.

Fig. 3.1

The plate-warmer contains two small candle heaters. Plates of food are placed on top of the warming-tray.

- (a) (i) State the name of a process by which the thermal energy from the candles passes to the warming-tray.

.....thermal energy.....[1]

- (ii) State the name of the process by which thermal energy moves through the warming-tray.

.....it moves the smoke up to the tray.....[1]

- (b) The outside of the plate-warmer is shiny.

Suggest how this helps the plate-warmer to stay hot.

.....get reflection.....[1]

- (c) The handles of the plate-warmer are made from metal.

Identify a problem with this, and suggest how the problem could be solved.

problem: The handle could be heated and difficult to touch.

action: using a product that is against heat or use gloves [2]
