

Worksheet 4: Interpreting data answers

- 1 What does this data set tell us in terms of jump results for female athletes and male athletes?

Males scored lower in the jump event than females.

- 2 Give three possible reasons for your findings from Question 1.

1. Males do not practice jumping events as much as females.

2. Different judges were used to score males and females in jumping.

3. Females at this school are better at jumping events than males.
